**Chronic Fatigue Syndrome (CFS)**

Nowadays CFS attracts greater and greater attention. Cause and effect relationships of CFS are listed in the international classification of diseases ICD-10 where basic attention is paid to psychical and psychosomatic disturbances. More than 96% of oncological patients suffer from CFS (1). Being experienced in needle-reflex (NRT) and millimeter therapy (MMT) in patients with CFS (2) we explore the combining of the given methods with SCENAR therapy (ST).

**Aim**

To explore the possibilities of combining treatments of patients with CFS with ST, NRT and MMT.

**Materials and methods**

Analysis was made from 55 patient case reports, who were divided into two groups: 1 (control) - 30 patients treated with NRT and MMT and 2 (experimental) - 25 patients treated with the methods given above combined with ST. The compatibility of the two groups by gender, age and disease character was confirmed by representative analysis.

The patients were examined with computer diagnostic complex "Rofus-24", which determines the energetic and functional condition of the main organs and systems. SCENAR diagnostic was done by the values of the initial reaction and the relative speed of the reaction in the zones on the front of the body, and the energetic channel of the urinary bladder - MC, RP, kidneys (R) respectively.

The treatment was conducted with MMT devices from the series - "LYCH-KVCH", whose detectors were fixed on the Adjna and Vishudha chakras for 3 minutes (tonization regime), NRT ways of influence on the "joy" point of MC and R, and "wind" and "warmth" points of RP. ST was conducted in subjective dosed regime on the zones given above, and along the energy pathways of the channels of RP and MC.

In this way the complex pathogenetic therapy of CFS leads to the normalization of the functional state of the body, bringing about an influence on all three levels of the energetic system: 1) the psycho-emotional sector; 2) the centers (chakras, controlling the basic functions); 3) improvement of the functions of RP. The combined treatments of CFS with the differing methodics and their mechanisms of action, allows the therapy to be completed in shorter terms.

The research in this direction is still continuing.

## SCENAR TECHNOLOGY OVERVIEW

The name SCENAR derives from: **Self-Controlled Energo-Neuro-Adaptive Regulation.**

The SCENAR is an electronic-therapy device invented by a team of Russian Scientists (Alexander Karasev and Prof. Revenko) and developed further by RITM OKB ZAO in the 1980's for use in space, where cosmonauts would have a means of treating themselves in orbit, without the need to take drugs.

RITM OKB ZAO is the only manufacturer of the original SCENAR technology.

RITM OKB ZAO now has set up a branch in Australia - RITM Australia to provide local support for their products - SCENAR devices for Professionals and Home user and Healing Blankets.

RITM SCENAR devices are CE Mark certified (the highest standard for manufacturing medical devices in the world), ISO 9001, ISO 13845.

RITM SCENAR devices are also included in the Australian Register for Therapeutic Goods Administration under TGA # 140659.

At present the SCENAR medical devices have been recognized in 60 countries all over the world: the United Kingdom, Australia, New Zealand, the Netherlands, Austria, Germany, Italy, Israel, Hungary, Czech Republic, Turkey, South Korea, the US, etc.

Over 6,000 doctors are now using the Scenar as an integral part of their medical practice.

The product range includes professional devices and devices for home users and sportsman, Healing Blankets and accessories.

	<b>Professional series SCENAR</b> devices – for medical practitioners and therapists
	<b>Home SCENAR device series</b> – sportsmen and personal home use
	<b>OLM</b> Healing Blankets and their modifications
